

**14th Annual
ANGUS BULL
SALE**

**Hamco
Cattle Co**

**Saturday, March 17, 2012
At the farm
Glenboro, MB**

HAMCO CATTLE CO.

We would like to welcome everyone to our 14th Annual Bull Sale. We hope you can join us before the sale to view the bulls & enjoy Angus Beef on a bun.

2011 was certainly a challenging year weather wise for Manitoba cattle producers. Fortunately the cattle markets have continued to improve and we are now seeing record prices. It is great to see renewed optimism about the future of the cattle industry. Maybe the comment "The longer it is bad, the longer it will good!" will be accurate. Congratulations to all the producers that stuck it out!

Albert, Gail & family

At Hamco we have continued to improve our herd through breeding top quality replacements & culling any problem cattle. The selection bar keeps getting higher for both females and the bulls for our sale. We continue to work hard to produce the best bulls we can through AI, ET and sourcing the best walking bulls we can produce or purchase. We selected this group of yearling bulls from a purebred herd of 500 cows. We screen and cull our bulls at least 4 times through their production phase, and end up selling the top 40% in the sale. We are confident this is the strongest group of bulls we have offered for sale.

The selection of a herd bull is a very important decision for your farm as your herd bull contributes 50% of your calf's genetics. For the most part, herd improvement comes from the bulls and it has been estimated that over 80% of herd improvement is directly attributed to bull selection. We feel we can provide the genetics to take your herd in the direction you need to go. The bulls we have to offer for sale are selected on performance, structural soundness, breeding soundness evaluations, temperament and calving ease. We have a good selection of bulls suitable for heifers ***, many bulls that would work on heifers or cows ** & some we recommend only using on cows * (see calving ease rating on each bull in the catalogue).

Glen, Carleen, Larissa, Jennalee

As breeders we believe we should provide as much information as possible so you can make an informed decision. We provide you with as much current information as possible in the catalogue. The bulls were on 112 day home test (Oct 21/11-Feb 10/12) and the information in this catalogue is current to Feb 11, 2012. Scrotal measurements were also done Feb 11 and at this age yearling bulls will add 1-1.5 cm/month so the scrotals will be approximately 1.5-2 cm larger by sale day. Two yr old bulls were weighed & breeding soundness evaluations were done on Feb 24, 2012.

Again this year we have done CUP certified ultrasound measurements (Ultra Beef) on the bulls to give you, our customers even more information for use in your selection. As a result you will see clip marks on the bulls where the ultrasound measurements were taken. We pictured a number of bulls but many good bulls were not pictured due to time constraints.

All bulls in the sale will have a satisfactory breeding soundness evaluation prior to the sale and are fully insurable on sale day. Some bulls catalogued will be out of the sale due to not passing the breeding soundness examination by sale day. For the sixth year we are offering a select group of 2 year old bulls in our sale. Most are specially held over virgin bulls that were too young to sell in last years sale.

Again we have a quiet group of bulls that are easy to handle. We would like to thank Cory Manning, Stewart Bertram, and Mark Abbey for all their hard work & dedication for helping us feed and manage the cow herd and bulls.

David, Shelley, Derek, Julie

We are very fortunate to be involved with the Angus breed. An Angus bull is the king of crossbreeding and will provide performance and desirable carcass traits to your herd while maintaining calving ease, high conversion rates, maternal strength, easy fleshing ability and the Angus vigor at birth. Remember all Angus bulls are homozygous polled. Also due to the high demand for AAA(choice) carcasses, the premium for AAA(choice) carcasses has been higher than usual. Having Angus genetics in your calves usually makes them more valuable when you go to sell them. The Angus cross females will make great mother cows. The resulting hybrid vigor is still one of the best deals in the cattle industry.

Our program's main target is to produce Angus bulls for the commercial producer and we are honored that our bulls have entered many top notch commercial programs. Managing a larger herd forces us to think like a commercial producer. We believe we have a number of bulls in this sale that would offer some excellent genetics to purebred herds as well.

Please call us if you have any questions about our bulls or our program. You can view the bulls anytime prior to the sale at the farm or on sale day. On a busy sale day we often don't have a chance to thank everyone individually, but we certainly appreciate your attendance at our sale. Thank you.

The Hamiltons

Saturday March 17, 2012

1:00 pm at Hamco Cattle Co. Glenboro MB

Offering 161 Lots

93 Red Angus Yearling Bulls
 25 Red Angus 2 year old Bulls

How To Read This Catalogue

EXPECTED PROGENY DIFFERENCES (EPDS)

EPDs are an estimate of how future progeny of each sire can be expected to perform in each of the traits listed. All EPD's are expressed in pounds, either plus or minus.

Birth Weight - BW - Predicts the difference in average birth weight of a bull's calves compared to the progeny of an Average Red and Black Angus bull.

Weaning Weight - WW - Indicates the ability of a sire's calves to grow from birth to weaning compared to an average bull

Yearling Weight - YW - Growth from birth to yearling, compared to the average

Milk - A predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters as compared to daughters of an average Red and Black Angus bull.

Total Maternal - TM - Predicts the difference in weaning weights of the sire's daughters progeny due to the combination of growth genetics and milking ability

Combined American & Canadian EPD's	BW	WW	YW	Milk	TM
2011 Canadian Red Angus Breed Averages	+0.5	+26	+50	+14	+27
2011 Canadian Black Angus Breed Averages	+2.8	+42	+74	+17	+38

ULTRASOUND DATA

Ultrasound data on our bulls was collected by CUP certified technician, Shari Beamish (Ultra Beef) and analyzed by the CUP Lab in Iowa & then sent to the CAA office.

Lean Meat Yield (LMY) - Cutability is the percentage of Lean Meat in a carcass. Yield grade is a very economically important factor in marketing carcasses. With a high genetic potential, this trait can be an important objective in a breeding program.

Rib Eye Area (Rea) - The Rib eye (measured in square inches) is a measurement of muscle in the carcass. Heritability 38%

Percent Intramuscular Fat (% IMF) - Marbling is the measurement of % intramuscular fat between the 12-13th ribs. A comparative chart is listed below.

% IMF	Marbling degree	Canada Quality Grade	US Quality Grade
2.3-3.9	Slight 0-4.0	A A	Select
4.0-9.7	Small to moderate	A A A	Choice
9.9-12.3	Slightly abundant to moderately abundant	A A A - Prime	Prime

The ideal level of marbling in a beef carcass is AAA or higher, based on Canadian Beef Grading Agency Standards. Marbling is moderately heritable (31%).

Rump Fat Thickness - Rump fat thickness (measured in inches) is the amount of external fat on the carcass. Rump fat is an indicator of carcass fat & the actual percent retail product from that carcass.

Rib Fat Thickness - Rib fat thickness (measured in inches) is a measure of the external fat on the carcass. Rib fat is another indicator of the % retail product of carcass. Fat is correlated to % retail product in the following way—the higher the fat thickness, the lower the percent retail of the carcass.

Management of Hamco Bulls

The yearling bulls for sale were all born in late Jan, Feb, March of 2010 and were weaned on Oct 4, 5 & 6, 2011. They did not receive any creep feed prior to weaning. The bulls were then developed on a carefully balanced total mixed ration (TMR). They were fed 50% alfalfa grass hay, 50% corn silage & the grain (oats, corn & supplement) was gradually increased over the first 2 months. By Dec 10, 2011, the bulls reached their final ration (dry matter basis) consisting of 30% alfalfa hay, 30% corn silage, 40% grain mix (corn, oats, corn distillers, & supplement). The bulls never had more than 13 lbs of grain mix per head per day. The TMR ration gives us complete control of the ration & insures that every bull receives the exact same feed. Bulls developed on a high forage TMR ration should never develop acidosis & laminitis, & should be healthy & be able to perform for years. The bulls are developed in a 4 acre pen & get a lot of exercise & should be athletic & ready to breed. We will continue to develop the bulls after the sale. The two year old bulls were similarly managed as yearlings and then maintained on a high forage ration. They were fed silage & concentrate & free choice grass/alfalfa hay/straw since December.

Health Status

This is a healthy group of bulls. They have all received 3 doses of MLV (IBR, BVD I & II, PI3, BRSV, Haemophilus) and 3 doses of 7 or 8-way blackleg vaccine. They have been treated with Ivermectin pour on twice. They have received 2 injections of Fusoguard - a foot rot vaccine that is effective in preventing foot rot - a condition you would certainly like to avoid in a breeding bull.

Pre Breeding (April) - (Calves) - MLV IBR/BVD I & II, PI3, BRSV, Pasteurella, & 8-way Blackleg

Pre Breeding - (Cows) - MLV IBR/BVD I & II, PI3, BRSV, Lepto

Mid July (preg check) - Calves Deworming on pasture (Ivermectin) & 8 - way Blackleg, IBR, BVD I & II, PI3, BRSV, Haemophilus

Weaning (October) - IBR, BVD I & II, PI3, BRSV, Haemophilus(Booster) & Ivermectin & 8 - way Blackleg

October 25, 2011 - Fusoguard (Foot Rot Vaccine)

January 2, 2012 - Fusoguard February 11, 2012 - Carcass ultrasound, All bulls tested for BVD, scrotal measurements

February 24, 2012 - Weigh 2 yr olds, semen test, Fusoguard, IBR/BVD I & II, PI3, BRSV, Haemophilus, 8 way Blackleg, ivermectin

March 8, 2012 - Semen test

Our whole herd is on a strategic vaccination protocol and parasite control program to assure our bulls stay healthy. However we know BVD is a potentially hidden yet devastating disease, & bulls can be carriers of the BVD virus (both from acute infection & as persistently infected (PI) carriers). Our vaccination program essentially insures that BVD should not be a problem in our bulls. To be sure all of our bulls were tested for BVD - persistent infection & *all tested negative*. *You can be assured that when you purchase a bull from us that the bull has been tested PI negative and is not a carrier of the BVD virus and he is adequately vaccinated against BVD.* We manage the feeding of the bulls very carefully. With our high forage TMR ration we were able to start the bulls on feed gradually & experienced no digestive upsets. On a 112 day test, the 178 bulls had an ADG of 3.36 and WDA of 3.26. We will continue to develop the bulls after the sale & insure a smooth transition from our ration to the grass based ration they will receive during the breeding season. All potential carriers of genetic defects have been tested, and as far as we are aware there should be no carriers of known genetic defects in the bulls

Sight Unseen Program

We would like you to attend our sale, but in this busy season, if this isn't possible, you can consider our sight unseen purchase program. Those who are interested in this plan are urged to call David or Larissa with your specifications and discuss the offering, & they will gladly assist you with sale selections and have someone represent you on sale day. Every effort will be made to buy you the right bull or bulls, at the right price to make you a repeat customer. If for any reason you are not satisfied with any of the bulls you purchased on order, you are under no obligation to accept them. You can also call one of the phones during the sale and bid live. We have permanent phone lines in case cell phone reception is a problem.

Semen Rights

Hamco would like to retain the right to possibly collect semen from a few bulls in the sale. At the owners convenience and at our cost we reserve the right to collect semen from any bull in the sale for in herd use only. We can also collect and freeze semen for the new owner if they wish. This can usually be done prior to delivery.

Free Board Till May 1

We will keep your bull up to May 1, 2012 at no additional charge. *Bulls are managed at the new owner's risk.* We recommend you insure your bull if your leave him with us. Insurance will be available sale day. After May 1, 2012 we can continue to board your bull for \$2.75/day.

Volume Discounts on Bull Purchases

Take advantage of our Volume Discounts on bulls purchased through this sale.

2 bulls - 2%

3 bulls - 3%

4 bulls - 4%

Up to 5% for 5 or more bulls

Hamco Bull Warranty

We guarantee to sell you a bull that is structurally sound, & has passed a breeding soundness evaluation. Should the bull fail to be a satisfactory breeder - unable to physically breed a cow or heifer, he will be replaced with a bull of equal value or credit given towards the purchase of another Hamco bull. In the event that your bull is a non-satisfactory breeder, we, the seller, will not, under any circumstances, be responsible for more than the original selling price of the bull in the sale. We will make sure you have a bull to get your cows bred. We however, will not provide replacement or adjustment for physical injury or mismanagement. We do not guarantee that semen collected from these bulls will freeze.

Delayed Payment Plan

We again are offering our Delayed Payment Plan. **You pay 50% of purchase price on sale day and 50% plus a \$35.00 surcharge due on Dec 1, 2012. (Post dated cheque required sale day for the remaining amount).** **Registration papers will be transferred when the final payment is made.**

Delivery

Free delivery on bulls up to 300 miles & then at cost. As well, we will deliver your bull free to central points in Western Canada or the US border. Delivery will be close to the date you request, but will be at our convenience. **Haul your own bull on sale day & receive \$50.00 off each bull.**

EPD	+0.9	+28	+58	+24	38

- * Produces easy fleshing, deep sided, good footed cattle.
- * Hamco purchased an exclusive semen package from this elite bull.
- * Has produced many high selling offspring— Mario 803M sold for \$26,000
- * His claim to fame is his daughters - unbelievable udder structure which has increased his milk EPD to breed topping status
- * Sired our high selling bull in 2005 to Kevin Archibald (\$4400) & our high selling bull in 2007 to Ringstead Ranch (\$7100).
- * Certainly one of the best Red Angus bulls we have ever used in our herd.
- * Semen is very rare and very expensive !!

- * Indeed 126Y is a moderate framed, extra thick bull with a deep muscular hindquarter.

- * Dam 32J is one of our foundation ET donor cows that is a CAA Elite cow. She is one of our best cows ever!! One of the great advantages of ET frozen embryos, is you can re create past successes. This mating is very proven & several full brothers have sold through the sale. They are all stamped the same way. These bulls give you an opportunity to add the genetics of 2 of the breeds greatest AI sires—Indeed 104H & Robin Hood.

Terms: The terms of sale are cash or cheque payable at par. Settlement to be made immediately after the completion of the sale. All settlements must be made with the clerk of the sale before any cattle will be released.

Disputes: In case of disputes, bidding will be re-opened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision of all disputes is final.

Announcements: All announcements made from the auction block will take precedence over the printed matter in the catalogue. Buyers should pay close attention to any such announcement.

Purchaser's Risk: Each animal becomes the risk of the purchaser as soon as sold.

Insurance: Insurance agents will be available on sale day.

Accidents: Although every precaution will be taken to protect the safety and comfort of buyers, neither the sale management nor the auctioneer assume any responsibility in this matter and disclaim any liability, legal or otherwise, in the event of accident or loss property.

Liabilities: All persons attending the sale do so at their own risk and sellers assume no liability, legal or otherwise, for any accidents occurring in or about the premises.

Please bring this catalogue with you to the Sale.
