

HAMCO CATTLE CO.

“Tenth Annual Angus Bull Sale”

**Friday, March 21, 2008
Glenboro, MB**

Dr. David & Shelley Hamilton

Albert & Glen Hamilton

Embryo Genetics Ltd.

Hamco Cattle Co.

First of all we would like to sincerely thank all of our many valued customers & friends who have supported our program over the past 10 years. We invite you to attend our 10th Annual Bull Sale at the farm south of Glenboro on Friday, March 21, 2008 at 1:00 p.m. We hope you can join us before the sale to view the bulls & enjoy Angus Beef on a bun. Please come even if you don't need a bull this year.

We are truly thankful and honored that so many good cattle operations have used our bulls. We work very hard to try and produce the best bulls we can through an aggressive AI & ET program, as well as walking high quality herd bulls. We select our bulls from a purebred herd of 550 cows. We screen and cull our bulls at least 4 times through their production phase, & end up selling the top 40% in the sale. As a result, only the best sell & this is certainly the best set of bulls we have offered for sale. This was confirmed by Brent Carey's skilled and discriminating eye when he went through our bull pen 2 weeks ago.

Trent, Albert, Gail, Ian, Travis

The selection of a herd bull is a very important decision for your farm as your herd bull contributes 50% of your calf's genetics. For the most part, herd improvement comes from the bulls and it has been estimated that over 80% of herd improvement is directly attributed to bull selection. We feel we can provide the genetics to take your herd in the direction you need to go. The bulls we have to offer for sale are selected on performance, structural soundness, breeding soundness evaluations, temperament and calving ease. We have a good selection of bulls suitable for heifers ***, many bulls that would work on heifers and cows **, and some we recommend only using on cows * (see calving ease rating on each bull in the catalogue). As breeders we believe we should provide as much information as possible so you can make an informed decision.

To facilitate your decision we have attempted to provide you with as much current information as possible in the catalogue. The bulls were on 112 day home test and the information in this catalogue is current to Feb 15, 2008 (end of test). Scrotal measurements were also done Feb 15 and at this age yearling bulls will add 1 -1.5 cm/month so the scrotals will be approximately 1.5 cm larger by sale day.

Again this year we have done CUP certified ultrasound measurements on the bulls to give you, our customers even more information for use in your selection. As a result you will see clip marks on the bulls where the ultrasound measurements were taken.

All bulls in the sale will have a satisfactory breeding soundness evaluation prior to the sale and are fully insurable on sale day. Some bulls catalogued will be out of the sale due to not passing the breeding soundness examination by sale day.

Glen, Carleen, Larissa, Jennalee

For the third year we are offering a select group of 2 year old bulls in our sale. Most are specially held over virgin bulls and a few were used this past spring and are experienced breeders.

Again we have a quiet group of bulls that are easy to handle. We would like to thank Cory Manning (cow boss), Stewart Bertram (straw boss) and Mark Abbey (handyman) for helping us feed and manage the cow herd and bulls. We appreciate their hard work and dedication.

An Angus bull is the king of crossbreeding and will provide performance and desirable carcass traits to your herd while maintaining calving ease, high conversion rates, maternal strength, easy fleshing ability and the Angus vigor at birth. The solid red color of the Red Angus will cross very well with almost any colored herd or crossbred herd. The Black Angus bulls will bring the dominant black hide color when desired along with all the desirable Angus traits. The Angus cross females will make great mother cows. The resulting hybrid vigor is still one of the best deals in the cattle industry.

David, Shelley, Derek, Julie

Our program's main target is to produce Angus bulls for the commercial producer and we are honored that our bulls have entered many top notch commercial programs. Managing a larger herd forces us to think like a commercial producer. We feed out about 300 of our own cattle per year and this has certainly taught us which ones are the right kind for today's market. We believe we have a number of bulls in this sale that would offer some excellent genetics to purebred herds as well.

Please call us if you have any questions about our bulls or our program. You can view the bulls anytime prior to the sale at the farm or on sale day. On a busy sale day we often don't have a chance to thank everyone individually, but we certainly appreciate your attendance at our sale. Thank you.

The Hamiltons

Sale Information

Friday, March 21, 2008

1:00 pm at Hamco Cattle Co. Glenboro MB

Offering 118 Lots

89 Red Angus Yearling Bulls
9 Red Angus 2 year old Bulls

How To Read This Catalogue

EXPECTED PROGENY DIFFERENCES (EPDS)

EPDs are an estimate of how future progeny of each sire can be expected to perform in each of the traits listed. All EPD's are expressed in pounds, either plus or minus.

Birth Weight - BW - Predicts the difference in average birth weight of a bull's calves compared to the progeny of an Average Red and Black Angus bull.

Weaning Weight - WW - Indicates the ability of a sire's calves to grow from birth to weaning compared to an average bull

Yearling Weight - YW - Growth from birth to yearling, compared to the average

Milk - A predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters as compared to daughters of an average Red and Black Angus bull.

Total Maternal - TM - Predicts the difference in weaning weights of the sire's daughters progeny due to the combination of growth genetics and milking ability

Combined American & Canadian EPD's	BW	WW	YW	Milk	TM
2007 Canadian Red Angus Breed Averages	+0.9	+29	+49	+14	+28
2007 Canadian Black Angus Breed Averages	+3.0	+37	+66	+15	+34

ULTRASOUND DATA

Ultrasound data on our bulls was collected by CUP certified technician, Shari Beamish and analyzed by the CUP Lab in Iowa.

Lean Meat Yield (LMY) - Cutability is the percentage of Lean Meat in a carcass. Yield grade is a very economically important factor in marketing carcasses. With a high genetic potential, this trait can be an important objective in a breeding program.

Rib Eye Area (Rea) - The Rib eye (measured in square inches) is a measurement of muscle in the carcass. Heritability 38%

Percent Intramuscular Fat (% IMF) - Marbling is the measurement of % intramuscular fat between the 12-13th ribs. A comparative chart is listed below.

% IMF	Marbling degree	Canada Quality Grade	US Quality Grade
2.3-3.9	Slight 0-4.0	A A	Select
4.0-9.7	Small to moderate	A A A	Choice
9.9-12.3	Slightly abundant to moderately abundant	A A A - Prime	Prime

The ideal level of marbling in a beef carcass is AAA or higher, based on Canadian Beef Grading Agency Standards. Marbling is moderately heritable (31%).

Rump Fat Thickness - Rump fat thickness (measured in inches) is the amount of external fat on the carcass. Rump fat is an indicator of carcass fat & the actual percent retail product from that carcass.

Rib Fat Thickness - Rib fat thickness (measured in inches) is a measure of the external fat on the carcass. Rib fat is another indicator of the % retail product of carcass. Fat is correlated to % retail product in the following way—the higher the fat thickness, the lower the percent retail of the carcass.

Management of Hamco Bulls

The yearling bulls for sale were all born in late Jan, Feb, March of 2007 and were weaned on Sept 26 & 27, 2007. They did not receive any creep feed prior to weaning. The bulls were then developed on a carefully balanced total mixed ration (TMR). They were fed 50% alfalfa grass hay, 50% corn silage & the grain (oats, corn & supplement) was gradually increased over the first 2 months. By Dec 10, 2007, the bulls reached their final ration (dry matter basis) consisting of 30% alfalfa hay, 30% corn silage, 40% grain mix (oats, corn, & supplement). The bulls never averaged more than 13 lbs of grain mix per day. The TMR ration gives us complete control of the ration & insures that every bull receives the exact same feed. Bulls developed on a high forage TMR ration should never develop acidosis & laminitis, & should be healthy & be able to perform for years. The bulls are developed in a 4 acre pen & get a lot of exercise & should be athletic & ready to breed. We will continue to develop the bulls after the sale. The two year old bulls were similarly managed as yearlings and then maintained on a high forage ration. They were then pail fed grain daily & free choice grass/alfalfa hay and some silage in the late fall/winter.

Health Status

This is a healthy group of bulls. They have all received 3 doses of MLV (IBR, BVD I & II, PI3, BRSV, Haemophilus) and 3 doses of 7 or 8-way blackleg vaccine. They have been treated with Normectin pour on twice. They have received 2 injections of Fusoguard - a foot rot vaccine that is effective in preventing foot rot - a condition you would certainly like to avoid in a breeding bull.

Pre Breeding (April) - (Calves) - MLV IBR/BVD I & II, PI3, BRSV, Haemophilus, & 7-way Blackleg

Pre Breeding— (Cows) - MLV IBR/BVD I & II, PI3, BRSV, Lepto x 5

Mid July (preg check time) - Deworming on pasture (Normectin) & 7 - way Blackleg

Weaning (September) - IBR, BVD I & II, PI3, BRSV, Haemophilus(Booster) & Normectin pour on & 8 - way Blackleg

January 8, 2008 - Fusoguard (Foot Rot vaccine)

January 8, 2008 - All bulls tested for BVD to identify any PI animals

February 15, 2008 - Fusoguard (Foot Rot vaccine Booster)& Pour On De Lice

March 11, 2008 - Will booster IBR/BVD I & II, PI3, BRSV, Haemophilus

**All Bulls Screened
Negative
For BVD**

Our whole herd is on a strategic vaccination protocol and parasite control program to assure our bulls stay healthy. However we know BVD is a potentially hidden yet devastating disease, & bulls can be carriers of the BVD virus (both from acute infection & as persistently infected (PI) carriers). All of our bulls were tested for BVD—persistent infection & all tested negative. You can be assured that when you purchase a bull from us that the bull has been tested PI negative and is not a carrier of the BVD virus and he is adequately vaccinated against BVD.

We manage the feeding of the bulls very carefully. With our high forage TMR ration we were able to start the bulls on feed gradually & experienced no digestive upsets. On a 112 day test, the 174 bulls had an ADG of 3.25 and WDA of 3.16. We will continue to develop the bulls after the sale & insure a smooth transition from our ration to the grass based ration they will likely receive during the breeding season.

Sight Unseen Program

We would like you to attend our sale, but in this busy season, if this isn't possible, you can consider our sight unseen purchase program. Those who are interested in this plan are urged to call David with your specifications and discuss the offering, and he will gladly assist you with sale selections and have someone represent you on sale day. Every effort will be made to buy you the right bull or bulls, at the right price to make you a repeat customer. If for any reason you are not satisfied with any of the bulls you purchased on order, you are under no obligation to accept them. You can also call one of the phones during the sale and bid live. We have permanent phone lines this year in case cell phone reception is a problem.

Hamco Bull Warranty

We guarantee to sell you a bull that is structurally sound, & has passed a breeding soundness evaluation. Should the bull fail to be a satisfactory breeder—unable to physically breed a cow or heifer, he will be replaced with a bull of equal value or credit given towards the purchase of another Hamco bull. In the event that your bull is a non-satisfactory breeder, we, the seller, will not, under any circumstances, be responsible for more than the original selling price of the bull in the sale. We will make sure you have a bull to get your cows bred. We however, will not provide replacement or adjustment for physical injury or mismanagement. We do not guarantee that semen collected from these bulls will freeze.

Semen Rights

Hamco would like to retain the right to possibly collect semen from a few bulls in the sale. At the owners convenience and at our cost we reserve the right to collect semen from any bull in the sale for in herd use only. We can also collect and freeze semen for the new owner if they wish.

Delayed Payment Plan

We again are offering our Delayed Payment Plan. You pay 50% of purchase price on sale day and 50% plus a \$35.00 surcharge on Dec 1, 2008. (Post dated cheque required sale day for the remaining amount). Registration papers will be transferred when the final payment is made.

Free Board Till Spring

We will keep your bull till May 1, 2008 at no additional charge. The bulls are managed at the new owner's risk. If you wish to insure your bull it may be purchased on sale day. After May 1, 2008 we can continue to board your bull for \$2.00/day.

Volume Discounts on Bull Purchases Take advantage of our Volume Discounts on bulls purchased through this sale.

2 bulls - 2%

3 bulls - 3%

4 bulls - 4%

Up to 10% for 10 or more bulls

Free Delivery

We will deliver your bull free of charge to your farm this spring. Haul your own bull sale day and receive \$50.00 off each bull.

- * A Brent Carey pick!!!
- * A great Indeed son that has been a standout since day 1!!
- * He is a power bull that will sire calves with extra performance, & his daughters will be awesome.
- * 98M is an outstanding cow, out of the foundation Prilark cow family that we rank very highly in our herd.
- * Great EPD's on this bull & his performance on test support them. Outstanding Carcass Data.

Lot 20 - Red Hamco ABS Hi Cap 61T

DEFINITELY ONE OF MY PEN FAVOURITES!!!

- * These High Capacity 008 sons are full of raw growth & he probably sires more growth than any bull that we have used in our program. Good carcass data.
- * Another very long, deep sided, dark red bull that will develop into a dominant herd bull. This bull was 3rd for ADG & 4th overall.
- * His dam 22H always raises one of our best calves. She has a great udder with lots of milk & we will flush her this spring. A Mac Fore son sold in our 2005 sale to Wytinck Farms for \$4000.

- * Dam 360N is an impressive young cow out of the Jessi family.
- * This bull would work well on heifers.

Lot 41 - Red Hamco Hi Capacity 545S

Reasons to Buy a Hamco Bull!!

- 1) Bulls are selected from a group of 240 bulls & only the good bulls make the cut and sell.
- 2) Our herd is on the Canadian Angus Association performance program. Complete performance data is available & published—birth wt, weaning wt, yearling wt, ADG, WDA, frame score, scrotal circumference, EPD's, calving ease, & CUP certified carcass data.
- 3) All bulls sold have passed a semen test & a breeding soundness examination. The bull you buy will be a satisfactory breeder and is insurable at sale time.
- 4) Bulls are developed on a high forage TMR ration for optimal development.
- 5) Bulls are quite tame, and they have lots of exposure to people as they are walked through daily.
- 6) We will manage your bulls and keep developing them free of charge till May 1, 2008 and for \$2.00/day after May 1, so that you don't have to worry about your bull until you need him to breed.
- 7) We will deliver your bull free of charge to your farm or haul your own bull sale day and receive \$50.00 off each bull purchased.
- 8) Bulls are on a strategic vaccination program and they are tested *BVD PI negative*.
- 9) Large Genetic base—we use top AI sires, elite embryo donors, and strong herd bulls. We offer a diverse package of genetics and if you have bought bulls from us before, there are numerous unrelated bulls in the sale.
- 10) Breeder's Guarantee—In short, we will get your heifers or cows bred with a Red or Black Angus from Hamco. We always have spare bulls available in case a problem should arise.
- 11) Deferred payment program—50% sale day, 50% Dec 1, 2008 (plus \$35.00 surcharge) Post dated cheque sale day required for remaining balance.
- 12) Volume discount available

CAA	B.W.	W.W.	Y.W.	Milk	TM
EPD	+6.6	+52	+91	+19	+44

- * 96L is sired by one of the most popular Red Angus bulls 'New Trend'
- * 96L was sold in our 2002 sale & we liked him so much that we bought him back.
- * His dam Sallee 3300 was a large framed, deep ribbed, dark red power cow we purchased from the Bieber mature cow dispersal.
- * 97L a full ET brother was used in our herd for a number of years & produced some great animals for us.
- * Many full siblings have been sold out of this combination.
- * Look at his numbers!!

* Another Enterprise 18M with some added punch!! He is extra thick, stout made with great depth of rib.
 * Dam 44L is a definite bull mother & had a full brother that was a high selling bull in a previous sale.
 * Recommended for cows

* This Enterprise 18M bull is a mirror image of his sire & certainly the right kind.
 * He had a brief show career at the side of his dam at the Glenboro Fair this past summer.
 * Larkaba 22M is a special cow for Larissa as she won \$800 at the Glenboro Fair when she won the Open Jackpot Heifer class as a bred heifer.
 * Her On Target son sells as Lot 108
 * This is a very good bull that deserves your attention - sorry we ran out of time & didn't get a picture.

Terms & Conditions

Terms: The terms of sale are cash or cheque payable at par. Settlement to be made immediately after the completion of the sale. All settlements must be made with the clerk of the sale before any cattle will be released.

Disputes: In case of disputes, bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision of all disputes is final.

Announcements: All announcements made from the auction block will take precedence over the printed matter in the catalogue. Buyers should pay close attention to any such announcement.

Purchaser's Risk: Each animal becomes the risk of the purchaser as soon as sold.

Insurance: Insurance agents will be available on sale day.

Accidents: Although every precaution will be taken to protect the safety and comfort of buyers, neither the sale management nor the auctioneer assume any responsibility in this matter and disclaim any liability, legal or otherwise, in the event of accident or loss property.

Liabilities: All persons attending the sale do so at their own risk and sellers assume no liability, legal or otherwise, for any accidents occurring in or about the premises.
