

A black Angus bull and a red Angus cow are the central focus of the image. The bull is in the background, looking to the right, with a small amount of water dripping from its mouth. The cow is in the foreground, looking directly at the camera. They are standing in a field with a wooden fence and a blurred background of trees and sky.

**21st Annual
Angus Bull Sale**

**Hamco
Cattle Co**

**Saturday, March 16, 2019
At the Farm
Glenboro, MB**

HAMCO CATTLE CO.

We would like to welcome everyone to our 21st Annual Bull Sale. We are very appreciative for the great customer support we have received over the past 21 years. We really hope you can join us before the sale to view the bulls & enjoy delicious Angus Beef on a bun.

At Hamco we have had a busy year. The weather presented some challenges but we were able to put up enough feed to maintain our cattle numbers. Kyle & Larissa had a baby girl, Nova Deborah Lee Curtis on June 24, 2018 & she has certainly been a welcomed addition to the family.

Kyle, Larissa, Glen, Nova, Carleen, Jennalee, Jake

We work hard at Hamco to try and produce the best bulls for your programs. The selection bar keeps getting higher for both the cow herd and the bulls for our sale. We select this group of yearling bulls from a calf crop of 530 calves. We screen and cull our bulls at least 4 times through their production phase, and end up selling approximately the top 40% in the sale. The two year olds were developed the same way and are mainly bulls that were too young to sell as yearlings. We do believe that this is a very strong set of bulls offered for sale this year.

The selection of a herd bull is a very important decision for your farm as your herd bull contributes 50% of your calf's genetics. For the most part, herd improvement comes from the bulls and it has been estimated that over 80% of herd improvement is directly attributed to bull selection. We feel we can provide the genetics to take your herd in the direction you need to go. We have a good selection of bulls suitable for heifers ***, many bulls that would work on well grown out heifers or cows ** and some we recommend only using on cows *

Nova - 7 months old

As breeders we believe we should provide as much information as possible so you can make an informed buying decision. We provide you with as much current information as possible in the catalogue. The bulls were on 116 day home test (Oct 17-Feb 11) and the information in this catalogue is current to Feb 11, 2019. Scrotal measurements were also done Feb 11 and at this age yearling bulls will add 1.5 cm/month so the scrotals will be approximately 2 cm larger by sale day. Two year old bulls were also weighed and scrotal measured on Feb 11, 2019. Most of the yearling bulls will be 120 lbs heavier by sale day. Updated scrotals will be available on sale day.

All bulls in the sale will have a satisfactory breeding soundness evaluation prior to the sale and are fully insurable on sale day. Some bulls catalogued will be out of the sale due to not passing the breeding soundness examination by sale day.

Again we have a quiet group of bulls that are easy to handle. We would like to thank Stewart Bertram and Brendan Williamson for their hard work and dedication on the farm. We would also like to thank our families and friends for their support and hard work to put on the bull sale.

We are very fortunate to be involved with the Angus breed. An Angus bull is the king of crossbreeding and will provide performance and desirable carcass traits to your herd while maintaining calving ease, high conversion rates, maternal strength, easy fleshing ability and the Angus vigor at birth. The resulting hybrid vigor is still one of the best deals in the cattle industry. Remember all Angus bulls are homozygous polled.

Derek, Shelley, Julie, David

Our program's main target is to produce Angus bulls for the commercial producer and we are honored that our bulls have entered many top commercial programs. Managing a larger herd forces us to think like a commercial producer. We believe we have a number of bulls in this sale that would offer some excellent genetics to purebred herds as well.

Please call us if you have any questions about our bulls or our program. You can view the bulls anytime prior to the sale at the farm or on sale day. This is a traditional bull sale with bulls penned and available to be viewed prior to the sale. We will then run them through the sales ring to sell them. This is the first year we will have online bidding through DLMS for those of you that are not able to attend in person. We will still have our sight unseen program available & you can bid on the phone if you prefer.

Thank you for the interest in our program and we look forward to seeing you on sale day.

How To Read This Catalogue

Calving Ease Code

This is our best estimate based on EPD's, actual birth wt & body shape. Take into consideration your own cow herd genetics, environment & feeding.

* Use on Cows

** Use on Cows & Growthy Heifers

*** Very few Calving Problems when bred to first calf heifers

Frame Score

Is a height measurement at a point directly over the hook bones of the pelvis. That measurement is then put into a formula that adjusts for the age of the bull. Frame score is a convenient way of describing the skeletal size of cattle. Most animals should maintain the same frame score throughout their life while actual height increases with age. No one frame size for an animal will be best for all feed resources, breeding systems & market specifications

EPDs

Growth EPDs

Birth Weight EPD: Expressed in lbs, predicts on average how much heavier or lighter than the breed average an animal's calves will be at birth.

Weaning Weight EPD: Expressed in lbs, predicts comparative progeny weight at 205 days of age; reflects pre-weaning growth potential that an animal is expected to contribute to its calves.

Yearling Weight EPD: Expressed in lbs, predicts the differences in progeny performance at 365 days; reflects the animal's calves' potential for post-weaning growth.

Fertility Trait EPDs

Calving Ease Direct EPD: Predicts the percentage of unassisted birthings expected from an animal's calves. This EPD reflects a combination of gestational growth and a calf's conformation. The higher the CED EPD, the more likely it is that the animal's calves will be born without assistance.

Calving Ease Maternal EPD: Predicts the percentage of unassisted births an animal's daughters will have with their first calves. This is a reflection of daughters' pelvic shape and level of hormonal reactions and stamina during labour. The higher the CEM EPD, the more likely it is that the animal's daughters will give birth without assistance.

Heifer Pregnancy EPD: The probability, in percentage, that an animal's daughters will conceive at 2 years of age.

Stayability EPD: The probability that a female will be retained in a herd past 6 years of age.

Milk EPD: Expressed in lbs of calf weaned, this is a prediction of an animal's daughter's milking ability.

Total Maternal EPD: A measurement comprised of half of an animal's Milk EPD and half of its additive genetic contribution to its calves' weaning weights.

Scrotal Circumference EPD: This EPD predicts the average scrotal circumference for an animal's sons. Scrotal circumference is used to gauge a bull's fertility.

CANADIAN ANGUS ONE GENETIC EVALUATION

Please note that the EPDs listed in this sale catalogue are the product of the new Canadian AngusONE Genetic Evaluation. These EPDs are calculated by Angus Genetics Inc in partnership with the American Angus Association. Therefore, EPDs for Canadian Red Angus, Canadian Black Angus, and American Black Angus animals are directly comparable to each other. This is a completely new base for Canadian Red Angus however, so please be advised that the EPDs are not comparable to last year's EPD's for Red Angus. These EPDs are on a completely different scale, so please familiarize yourself with the new Breed Average and with the new threshold number for traits of importance to you. The new AngusONE breed averages are shown below to help you adjust to the new base. Percentile rank graphs for each animal are easy to use and available at www.cdnangus.ca. The right EPD for you will depend on your cow herd, your management, and your breeding goals.

Combined American & Canadian EPD's	CED	BW	WW	YW	Milk	TM
2018 <u>Canadian Black</u> Angus Breed Averages	+3.0	+2.3	+45	+78	+21	+43
2018 <u>Canadian Red</u> Angus Breed Averages	+2.4	+1.2	+35	+58	+19	+36

Management of Hamco Bulls

The yearling bulls were all born in late Jan, Feb, March of 2018 and were weaned on Sept 17, 18 & 19, 2018. They did not receive any creep feed prior to weaning. The bulls were then developed on a carefully balanced total mixed ration (TMR). On a dry matter basis they were fed 50% alfalfa grass hay, 50% corn silage & the grain (oats, corn & supplement) was gradually increased over the first 2 months. By Dec 25, 2018, the bulls reached their final ration (dry matter basis) consisting of 30% grass hay, 30% corn silage, 40% grain mix (corn, oats, corn distillers, & supplement). The bulls should never have had more than 12.5 lbs of grain mix per head per day. The TMR ration gives us complete control of the ration and insures that every bull receives the exact same feed. Bulls developed on a high forage TMR ration should never develop acidosis and laminitis, and should be healthy and be able to perform for years. The bulls are developed in a 4 acre pen & get a lot of exercise and should be athletic and ready to breed. We will continue to develop the bulls after the sale. The two year old bulls were similarly managed as yearlings and then maintained on a high forage ration. They were fed a high forage TMR with plenty of exercise in a 15 acre pen..

Health Status

This is a healthy group of bulls. They have all received 3 doses of MLV (IBR, BVD I & II, PI3, BRSV, Haemophilus) and 3 doses of 8-way blackleg vaccine. They have been treated with Ivermectin pour on twice and a permethrin once. They have received 2 injections of Fusoguard - a foot rot vaccine that is effective in preventing foot rot - a condition you would certainly like to avoid in a breeding bull.

Birth-Inforce 3 (Intranasal IBR, PI3, BRSV)

Pre Breeding (April) -(Calves) - MLV IBR/BVD I & II, PI3, BRSV, Pasteurella, & 8-way Blackleg

Pre Breeding- (Cows) - MLV IBR/BVD I & II, PI3, BRSV, Lepto, 8-way Blackleg

Mid July (preg check) -(Calves) Deworming on pasture (Longrange), 8-way Blackleg, IBR, BVD I & II, PI3, BRSV, Haemophilus

Weaning (September)-Ivermectin pour on, Longrange injectable dewormer & 8-way Blackleg & Fusoguard(Foot Rot Vaccine- Bulls)

October 17, 2018 - Fusoguard & IBR, BVD I & II, PI3, BRSV, Haemophilus, test start weights

February 11, 2019 - Weigh yearlings, scrotal measurements, frame score measurements, Vetolice pour on

February 11, 2019 - Weigh 2 yr olds, scrotal measurements, Vetolice pour on

-March 6 & 7, 2019 - Semen test yearlings & 2 year olds (Fusoguard, IBR/BVD I & II, PI3, BRSV, Haemophilus, 8-way Blackleg)

Our whole herd is on a strategic vaccination and parasite control program to insure our bulls stay healthy. However we know BVD is a potentially hidden yet devastating disease, & bulls can be carriers of the BVD virus (both from acute infection & as persistently infected (PI) carriers). Our vaccination program essentially insures that BVD should not be a problem in our bulls. You can be assured that when you purchase a bull from us that the bull is PI negative and is not a carrier of the BVD virus and he is adequately vaccinated against BVD. We manage the feeding of the bulls very carefully. With our high forage TMR ration we were able to start the bulls on feed gradually & experienced no digestive upsets. On a 116 day test, the 220 bulls had an ADG of 3.14 and WDA of 3.12. We will continue to develop the bulls after the sale & insure a smooth transition from our ration to the grass based ration they will receive during the breeding season. All potential carriers of genetic defects have been tested, and as far as we are aware there should be no carriers of known genetic defects in the bulls.

Sight Unseen Program

We would like you to attend our sale, but in this busy season, if this isn't possible, you can consider our sight unseen purchase program. Those who are interested in this plan are urged to call Larissa or David with your specifications and discuss the offering, & they will gladly assist you with sale selections and have someone represent you on sale day. Every effort will be made to buy you the right bull or bulls, at the right price to make you a repeat customer. If for any reason you are not satisfied with any of the bulls you purchased on order, you are under no obligation to accept them. You can also call one of the phones during the sale and bid live. Please call before the sale so we can have someone on the phone with you.

**** New this Year-DLMS Bid Online**

Semen Rights

Hamco would like to retain the right to possibly collect semen from a few bulls in the sale. At the owners convenience and at our cost we reserve the right to collect semen from any bull in the sale for in herd use only. We can also collect and freeze semen for the new owner if they wish. This can usually be done prior to delivery.

Free Board Till April 15, 2019

We will keep your bull up to April 15, 2019 at no additional charge.

Bulls are managed at the new owner's risk. We recommend you insure your bull if your leave him with us. Insurance will be available sale day.

After April 15, 2019 we can continue to board your bull for \$3.50 day.

Volume Discounts on Bull Purchases

Take advantage of our Volume Discounts on bulls purchased through this sale.

2 bulls - 2%

3 bulls - 3%

4 bulls - 4%

5 bulls or more - 5%

Hamco Bull Warranty

We guarantee to sell you a bull that is structurally sound, & has passed a breeding soundness evaluation. Should the bull fail to be a satisfactory breeder—unable to physically breed a cow or heifer, he will be replaced with a bull of equal value or credit given towards the purchase of another Hamco bull. In the event that your bull is a non-satisfactory breeder, we, the seller, will not, under any circumstances, be responsible for more than the original selling price of the bull in the sale. We will make sure you have a bull to get your cows bred. We however, will not provide replacement or adjustment for physical injury or mismanagement. We do not guarantee that semen collected from these bulls will freeze.

Delayed Payment Plan

We again are offering our Delayed Payment Plan Option. You pay 50% of purchase price on sale day and 50% plus a \$35.00 surcharge due on Dec 1, 2019. (Post dated cheque required sale day for the remaining amount). Registration papers will be transferred when the final payment is made.

Delivery

Free delivery on bulls up to 300 miles & then at cost. As well, we will deliver your bull free to central points in Western Canada or the US border and cost will be shared to Eastern Canada. We will make every effort to get your bull to your farm. Delivery will be close to the date you request, but will be at our convenience. If you can not take your bull when we are in your area, we would appreciate if you made arrangements to pick up your bull. **Haul your own bull on sale day & receive \$100.00 off each bull.**

- * Packer 133Y is definitely one of the best bulls we have produced at Hamco. He was the high selling bull in our 2012 Bull Sale to T Bar K Ranch.
- * We retained semen for in herd use, and he has done a great job for T Bar and Hamco
- * He has sired very impressive sons and daughters in both herds. We have retained a son for use in our own herd. He has bred on extremely well and stamps them out the same way every time. When I walk through the bull or heifer pen, his calves consistently catch my eye. I had the pleasure of attending the T Bar K herd dispersal Sale this fall & daughters of Packer 133Y were very impressive and sold very well.
- * Impressive EPD's Top 1% WW, YW, TM, carcass, marbling, top 10% REA, top 35% BW, CED

Canadian Angus Tag Program

The Canadian Angus Tag Program is the largest branded tag program in the world. The tags visually and electronically identify cattle that are guaranteed Angus. Animals wearing the green RFID tags are a minimum of 50% Angus genetics as they have at least one registered Angus parent. Canadian Angus tags are CCIA approved. Order your tags today and have them delivered right to your mailbox.

You have to tag them anyway, why not tag them Angus?

Order your Angus tags today: Call 1-888-571-3580 Visit www.cdnangus.ca

King of The Pasture

Reasons to Buy a Hamco Bull!!!

- 1) Bulls are selected from a group of 270 bulls & only the good bulls make the cut and sell.
- 2) Our herd is on the Canadian Angus Association performance program. Complete performance data is available & published—birth wt, weaning wt, yearling wt, ADG, WDA, frame score, scrotal circumference, EPD's, calving ease,
- 3) All bulls sold have passed a semen test & a Breeding Soundness examination. The bull you buy will be scored satisfactory and is fully insurable at sale time.
- 4) Bulls are developed on a high forage TMR ration for optimal development.
- 5) Bulls are quite tame, and they have lots of exposure to people as they are walked through daily.
- 6) We will manage your bulls and keep developing them free of charge till April 15, 2019 and for \$3.50 day after April 15, so that you don't have to worry about your bull until you need him to breed.
- 7) We will deliver your bull to your farm or haul your own bull sale day and receive \$100.00 off each bull purchased.
- 8) Our herd & the bulls are on a strategic vaccination program .
- 9) Large Genetic base—we use top AI sires, elite embryo donors, and strong herd bulls. We offer a diverse package of genetics and if you have bought bulls from us before, there are numerous unrelated bulls in the sale.
- 10) Breeder's Guarantee—In short, we will get your heifers or cows bred with a Red or Black Angus from Hamco. We always have spare bulls available in case a problem should arise.
- 11) Deferred payment program—50% sale day, 50% Dec 1, 2019 (plus \$35.00 surcharge) Post dated cheque sale day required for remaining balance.
- 12) Volume discount available

Terms: The terms of sale are cash or cheque payable at par. Settlement to be made immediately after the completion of the sale. All settlements must be made with the clerk of the sale before any cattle will be released.

Disputes: In case of disputes, bidding will be re-opened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision of all disputes is final.

Announcements: All announcements made from the auction block will take precedence over the printed matter in the catalogue. Buyers should pay close attention to any such announcement.

Purchaser's Risk: Each animal becomes the risk of the purchaser as soon as sold.

Insurance: Insurance agents will be available on sale day.

Accidents: Although every precaution will be taken to protect the safety and comfort of buyers, neither the sale management nor the auctioneer assume any responsibility in this matter and disclaim any liability, legal or otherwise, in the event of accident or loss property.

Liabilities: All persons attending the sale do so at their own risk and sellers assume no liability, legal or otherwise, for any accidents occurring in or about the premises.

Please bring this catalogue with you to the Sale.
